# ORGANIC & BIODYNAMIC WINES

This section has been created to give more importance to wines not produced from conventional agriculture explaining the meaning & the difference between organic & biodynamic wines.

**Organic wines:** These are wines made from organically grown grapes where natural methods are used for controlling insects, disease & weeds in the vineyards. No herbicides, pesticides or chemical fertilisers are used & only approved, natural substances are applied in the vineyards & winery. The use of sulphur dioxide as a preservative is dramatically lowered versus conventionally made wines.

**Biodynamic wines:** The ultimate state of farming with nature. This approach views the farm as a single organism rather than different components & interference can affect the natural 'rhythm' of the farm. Planting, pruning & harvesting is in accordance with a biodynamic calendar.

<i>80% Cabernet Sauvignon, 10% Cabernet Franc, 8% Merlot, 2% Petit Verdot. Amazing concentration on the nose. Spicy, warm &amp; decadent with blackcurrant aromas. It has a beguiling richness &amp; weight in the mouth. Sensational in every way, this fabulous wine could easily surpass their recent triumphs &amp; even the legends of the past.</i>
