ORGANIC & BIODYNAMIC WINES

This section of our wine list has been created to showcase winemakers who work in sync with nature rather than against it – producing interesting wines not made from conventional agriculture.

ORGANIC WINES

These are wines made from organically grown grapes where natural methods are used for controlling insects, disease & weeds in the vineyards. The use of sulphur dioxide as a preservative is dramatically lowered versus conventionally made wines.

BIODYNAMIC WINES

The ultimate state of farming with nature. This approach views the farm as a single organism rather than different components & interference can affect the natural 'rhythm' of the farm. Planting, pruning & harvesting is in accordance with a biodynamic calendar.
